And the best part is that, all of those cool tricks and special effects are done for free. Below, you can find an example of the how to do this yourself. In this tutorial, we will demonstrate how you can make it look like you are seeing out of the game. Making the background Video Loop First, we will use Coub to create a video loop. Step 1: Select the video loop that you want to make as background. Select the video that you want to make as background and click on the Coub button (see screenshot below). Then click on the Create and name the video ... button. Then Coub will show you the video loop. And you will see that the video loop that you have selected is on top. Step 2: Add some effects to the video loop. Now you have a new video loop as background, which you can play. But you want to make it look like you are not playing the background, but the game. To do this, you can use the effects that are available to your video. Step 3: Add subtitles to the background video loop. Select the video that you want to make as background and click on the Coub button. Then click on the Add Subtitles... button. Then Coub will show you the subtitle file that you want to add to the background. Step 4: Play the background video loop. Once you have finished the preparation steps above, you can now press the play button. If you watch closely, you will see that the video loop is playing in the background of the game. This tutorial shows how you can make it look like you are seeing out of the game. Make a fully adjustable Control Mode From my understanding, when you play a game on PC or Console, you usually need to use the keyboard, mouse or gamepad to move your character. And this is also true when you are playing an online game on the Internet. Usually, you need to use the keyboard and mouse to change the camera view. Of course, you can always use the gamepad to play the game, but using the gamepad is not always an easy option. And there is no easy way to make this process fully adjustable. But using the new Camera Control Mode in Coub, you can make 82157476af
